

## MANUFACTURING &amp; BUILDING MATERIALS

# CEMEX UK

Centrica Business Solutions' energy insights enable global building materials giant CEMEX to capture cost savings and efficiency improvements across UK sites.

**42**

Sensors deployed

**£1,600**

Immediate savings

**Multi-site**

Rollout

## The Challenge

CEMEX UK operates a portfolio of energy-intensive cement, aggregates, and ready-mix sites. Standardizing energy monitoring across diverse processes and legacy electrical infrastructure had previously been cost-prohibitive.

## The Solution

42 Panoramic Power sensors were deployed across pilot sites, providing circuit-level insight without disruption to operations. PowerRadar analytics surfaced quick-win opportunities and supported broader UK rollout planning.

## Results

- £1,600 in immediate identified savings from the pilot.
- Validated business case for multi-site UK deployment.
- Visibility into compressor, conveyor, and ancillary load patterns.
- Foundation for ongoing M&V; across the portfolio.

*“Panoramic gave us a level of insight into equipment that we've never had before.”*

— Adam Leverett, Head of Operational Excellence, CEMEX
